

Essential STD Exam Skills

**May 11-12, 2009
Seattle, Washington**

Course description

The focus of this course is to provide clinicians with **knowledge** and **skills** in conducting male and female STD examinations. This includes taking a sexual history, basic anatomy and examination skills practice taught in both a **didactic** and **hands-on** format using live model patients.

Course objectives

1. Describe skills for effective patient/provider communication in order to complete a sexual history and risk assessment for STDs and related reproductive health problems.
2. List equipment necessary to perform a routine STD examination.
3. Describe basic reproductive anatomy and be able to perform an STD physical examination.
4. Identify the sites from which specimens should be obtained and proper techniques in specimen collection.
5. List the laboratory tests which are recommended for screening patients at risk for STDs.

Audience

This course is designed for clinicians new to caring for patients seeking STD-related care.
