

Chlamydia Test
Region X Infertility Prevention Project

**Changes in the Laboratory Slip used in the Region X IPP (Chlamydia) Project
Effective 1/2/09**

Bar Code: Has been added to assist the PH Lab in electronic reporting.

Specimen Site: Added: “Rectal”; “Vaginal-patient”; and, “Vaginal-clinician”

Section completed by Laboratory Staff: There are changes in CT/GC Test and Test Results. This area of the lab slip is completed by the Oregon Public Health Laboratory.

Examination:

- Changed, “ Client not examined” to “Client Examined - Yes No”
- Removed: Under “Findings Male”, “≥5 PMNs/hpf”

Reason for Visit:

- Added: “**Exposed to GC**”
- Changed: “Any Pregnancy – Related Visit: to: “Pregnancy Test Only”
- Changed: “Rescreening – Prior CT + 3-6 mos.” To “Rescreening CT +”
- Added: “Rescreening GC +”

Other: Changed “IUD Insert Planned” to “IUD Insert”

Symptoms:

- Removed: “Dysuria”
- Removed: “Abdominal/Pelvic/Testicular Pain”
- Removed: “Abnormal Vaginal Bleeding”

Risk History:

- Removed: “If yes, _____# previous partners → _____# treated”
- Removed: Other STD last 12 months
- Added: “Sex partner w/ concurrent sex partner last 12 months: Yes, definitely Not sure, possibly No, unlikely”

Ahler’s Copy: The pink sheet is now on top of the green sheet (Clinic Copy). The green sheet should continue to be filed in the client’s medical record and could be attached to the PH Lab report with the test results.
